

Project results

Upgrading existing social health care practices in the area, which in turn will increase the quality of health care services provided to residents.

The most immediate and effective response to emergencies related to patients with mobility problems or in remote areas.

To obtain important statistics on the medical situation of the regions in order to prevent and respond to situations that may endanger the public health of the regions.

Strengthening the cooperation of partners in more than one activity and the exchange of knowledge and experience.

The contents of this flyer are sole responsibility of Municipality of Nestos and can in no way be taken to reflect the views of the European Union, the participating countries the Managing Authority and the Joint Secretariat

Interreg
Greece-Bulgaria
e-SOHECA
European Regional Development Fund

A project of social responsibility for the Municipality of Nestos, with respect to people and the health of every citizen.

The Project

The e-SOHECA project is implemented within the framework of the INTERREG V-A Greece - Bulgaria 2014 - 2020 Cross-border Programme by the Municipalities of Nestos, Topeiros and Zlatograd.

The main objective of the project is the creation of an Electronic Social Care and Welfare System, which will be accessible to all citizens of the cooperating Municipalities. At the same time, equipment and maintenance work will be carried out to upgrade Regional Medical Centres in the relevant areas.

The main objective of the project is the development of an Electronic Medical Record for those citizens who wish to have it, as well as access to basic medical measurements..

In addition, equipment will be piloted to specific vulnerable groups of citizens who are far from Medical Centres to take measurements, which can be recorded directly in the system. The information can be sent to the medical staff monitoring the patient in question, while emergency alerts can be sent.

Activities

Management & Coordination.

W.P. 1 Integrated Management based on the Programme and continuous monitoring of its progress. Permanent coordination and cooperation of the partners.

Communication & Dissemination.

W.P. 2 Continuous public information through communication actions in each municipality. Website, Newsletters, Conferences - Workshops

Studies & Common Practices.

Infrastructure & Equipment

W.P. 4 Renovation and upgrading projects of the Medical Centres of all three Municipalities. Supply of medical equipment.

Electronic Social Care System

W.P. 5 Development, installation and configuration of the Electronic Social Care system.

User Training

W.P. 6 Training of all relevant parties in the use of the system.

Cross-border Programme
INTERREG V-A Greece Bulgaria 2014 - 2020 

Objectives of e-SOHECA

Creation of Medical Files for local residents, where all data from diagnoses and measurements can be downloaded, stored and accessed at any time through the system.

Provision of remote e-Health and Social Care services to elderly residents and people with disabilities.

Eliminating social discrimination and promoting equal treatment and social inclusion of people, regardless of where they live.
